

COLUMN HEADER

A solution to display compositions using our VM One frames is the VitrineMedia UK Column Header frame. This LED light box has been created in two formats which enable the Column Header to be positioned above A4 VM One frames displayed in a landscape orientation and A3 frames in a landscape or portrait orientation.

KEY FEATURES

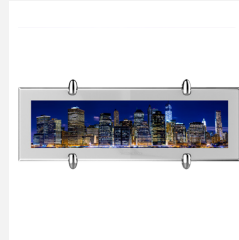

A COMPOSITION SOLUTION

Designed for positioning above VM One frame sequences

DOUBLE-SIDED ILLUMINATION

Maximise your advertising space by displaying graphics on both sides

HIGH LUMINOSITY

Delivering 5000 Lux, this is a highly luminous lightbox

DISPLAY VERSATILITY

Use our VM Cable system to create adaptable display solutions that are easy to install

DETAIL

The Column Header is identical in design to the VM One poster frame and features a silver-grey border and rounded edges. The frame has been designed with visible external fixings that create a modern look reflecting the style and engineering of the VitrineMedia UK range. With double-sided illumination from the internal LED light source, the Column Header frame can be used to display graphics back to back which maximises space in a window display. The frames are compatible with our VM Cable display solution which enables rows of frames to be suspended within a window installation.

Graphics are easily changed with the Column Header's magnetic opening which ensures display visuals can be updated quickly. Featuring a 9mm depth, the Column Header frame provides a slim LED light box solution.

TECHNICAL SPECIFICATION

A4 frame dimensions	335 x 137mm
A3 frame dimensions	460 x 137mm
Depth	9mm
Combine panel formats	Yes, the frame is compatible with the VM One range
