

VM I MAX

An LED light box with style and impact, the new I Max display frame features a contemporary black border and an impressive 5000 Lux light intensity. To maximise space, the frames are just 10mm deep and are double-sided to enable graphics to be placed on either side of the powerful internal light source.

KEY FEATURES

INNOVATIVE FIXINGS

Unique hanging system for easy installation

DOUBLE-SIDED ILLUMINATION

Maximise your advertising space by displaying graphics on both sides

HIGH LUMINOSITY

Delivering 5000 Lux, this is a highly luminous lightbox

DISPLAY VERSATILITY

Use our VM Cable system to create adaptable display solutions

DETAIL

VM I Max is available in either a portrait or landscape orientation in A-series dimensions from A4 to A0 without compromising the 10mm depth of the slim illuminated display frame. To create stylish window arrangements, the frame is compatible with our VM Cable installation system and can be inclined to create a viewing angle of 0 to 90 degrees. With external fixtures, the I Max frame benefits from a modern design which enhances graphics on display.

In addition to the A-Series lightboxes, three banner options have been created to enable compositions of multiple frames with headers. Each banner is 35mm in height and available in widths of 60mm, 100mm and 125mm.

Finally, take a look at our wall mounted I Max frames which complete the VM I Max range and provide versatility for creating uniform installations using this frame design.

TECHNICAL SPECIFICATION

A4 frame dimensions	335 x 247mm
A3 frame dimensions	459 x 335mm
A2 frame dimensions	632 x 459mm
A1 frame dimensions	879 x 632mm
Depth	10mm
Combine panel formats	Fixtures do not allow combinations of different panel formats
