

## VM BOX

VM Box is our portable display system which has been designed to be assembled and disassembled easily without any tools. This flexibility means VM Box is ideal for exhibitions, trade events and demonstrations where it can be used to display and power a maximum of ten LED poster frames.

### KEY FEATURES

#### CHANGE AND REARRANGE

Clip on and off your choice of display frames with our cleverly designed fixing system. The frames clip onto rods attached to the base unit which provide power to light up the display.

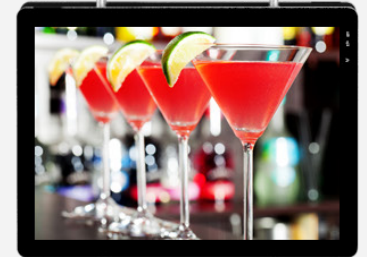

#### A CUSTOMISABLE SYSTEM

Add your logo to the base, customise the colour to reflect your brand and choose between two base heights of 27cm and 37cm. As an additional option, an integrated motor can be added which allows the display column to automatically turn by 180 degrees.

### OVERVIEW

- Quick to assemble using just the base, rods and your choice of frames
- Supplied with a robust box for ease of transportation
- Customise the base by choosing its colour and adding your logo
- Compatible with VM Super Light and VM Two Clip frames
- Supplied with a two year warranty

Compatible displays

VM TWO CLIP	A4 Portrait A4 Landscape A3 Portrait
VM SUPER LIGHT	A4 Landscape

NO TOOLS REQUIRED

To construct the display stand simply screw the rods together then screw them into the base unit. Clip on your choice of LED frames and power up.
